

Integrated Personal Information Management System

Abstract

An integrated personal information management system is described. In one embodiment, for example, an integrated personal information management system is described that comprises: a receptacle holding at least one paper page that is capable of receiving pen strokes from a digital pen; a digital pen for recording pen strokes when a user writes on a particular paper page; a page identifier for identifying the particular paper page on which the user is writing; and a handheld personal information device in communication with the digital pen and page identifier for processing the recorded pen strokes associated with the particular paper page and displaying the processing results on a display screen.
